Press Release Subject: Clean Energy Initiative

From: John Mans, Superintendent of Menominee Area Public Schools

Date: April 23, 2019

Thanks to the M&M Area Community Foundation, with funding from the C.S. Mott Foundation Clean Energy Initiative, the Menominee Area Public Schools received a donation to install LED lighting in our bus garage. This will significantly reduce energy consumption in this area. Funding from the Community Foundation also helps provide opportunities for teachers to receive professional development in Energy Education. Teachers learn how to integrate clean energy curriculum appropriately in the current science coursework. Students work with hands-on projects that provide experiences with recycling, reuse, and reduction in waste. . A big thank you goes out to the M&M Area Community Foundation's Clean Energy Team for their assistance with the grant.
